

Resetting and Closing Streams

IETF 117, San Francisco

Marten Seemann, Kazuho Oku

Updates since Yokohama

- 奥一穂 joined as a co-editor
- RELIABLE_RESET_STREAM was renamed to CLOSE_STREAM
- CLOSE_STREAM has 2 variants

CLOSE_STREAM Variants

```
CLOSE_STREAM Frame {  
    Type (i) = 0x20..0x21,  
    Stream ID (i),  
    [Application Protocol Error Code (i)],  
    Final Size (i),  
    Reliable Size (i),  
}
```

CLOSE_STREAM frame type

- ok to use a 1-byte frame type?

Name of the Frame

- keep CLOSE_STREAM?
- go back to RELIABLE_RESET_STREAM?
- something else?

Plans until Prague

- Ship -02 (next month?)
- After that: WGLC?
