

19 March 2025

IETF 122 QUIC WG

This session is being recorded

Note Well

This is a reminder of IETF policies in effect on various topics such as patents or code of conduct. It is only meant to point you in the right direction. Exceptions may apply. The IETF's patent policy and the definition of an IETF "contribution" and "participation" are set forth in BCP 79; please read it carefully.

As a reminder:

- By participating in the IETF, you agree to follow IETF processes and policies.
- If you are aware that any IETF contribution is covered by patents or patent applications that are owned or controlled by you or your sponsor, you must disclose that fact, or not participate in the discussion.
- As a participant in or attendee to any IETF activity you acknowledge that written, audio, video, and photographic records of meetings may be made public.
- Personal information that you provide to IETF will be handled in accordance with the IETF Privacy Statement.
- As a participant or attendee, you agree to work respectfully with other participants; please contact the ombudsteam (<https://www.ietf.org/contact/ombudsteam/>) if you have questions or concerns about this.

Definitive information is in the documents listed below and other IETF BCPs. For advice, please talk to WG chairs or ADs:

- [BCP 9](#) (Internet Standards Process)
- [BCP 25](#) (Working Group processes)
- [BCP 25](#) (Anti-Harassment Procedures)
- [BCP 54](#) (Code of Conduct)
- [BCP 78](#) (Copyright)
- [BCP 79](#) (Patents, Participation)
- <https://www.ietf.org/privacy-policy/> (Privacy Policy)

Note Really Well

- IETF meetings, virtual meetings, and mailing lists are intended for professional collaboration and networking, as defined in the IETF Guidelines for Conduct (RFC 7154), the IETF Anti-Harassment Policy, and the IETF Anti-Harassment Procedures (RFC 7776). If you have any concerns about observed behavior, please talk to the Ombudsteam, who are available if you need confidentiality to raise concerns confident about harassment or other conduct in the IETF.
- The IETF strives to create and maintain an environment in which people of many different backgrounds and identities are treated with dignity, decency, and respect. Those who participate in the IETF are expected to behave according to professional standards and demonstrate appropriate workplace behavior.
- IETF participants must not engage in harassment while at IETF meetings, virtual meetings, social events, or on mailing lists. Harassment is unwelcome hostile or intimidating behavior—in particular, speech or behavior that is aggressive or intimidates.
- If you believe you have been harassed, notice that someone else is being harassed, or have any other concerns, you are encouraged to raise your concern in confidence with one of the Ombudspersons.

This session is being recorded

IETF 122 Meeting Tips

In-person participants

- Make sure to sign into the session via Datatracker or the QR Code in this session.
- Use Meetecho (usually the "Meetecho lite") client to:
 - join the mic queue
 - participate in shows of hands
- *Keep audio and video off if not using the onsite version.*

Remote participants

- Make sure your audio and video are off unless you are chairing or presenting during a session.
- Use of a headset is strongly recommended.

Resources for IETF 122 Bangkok

- Agenda
<https://datatracker.ietf.org/meeting/agenda>
- Meetecho and other information:
<https://www.ietf.org/how/meetings/preparation>
- If you need technical assistance, see the Reporting Issues page:
<http://www.ietf.org/how/meetings/issues/>

Admin

- Note takers... plz
 - <https://notes.ietf.org/notes-ietf-122-quic>
- Chat is Meetecho/Zulip
- Chairs will manage the queue

Agenda

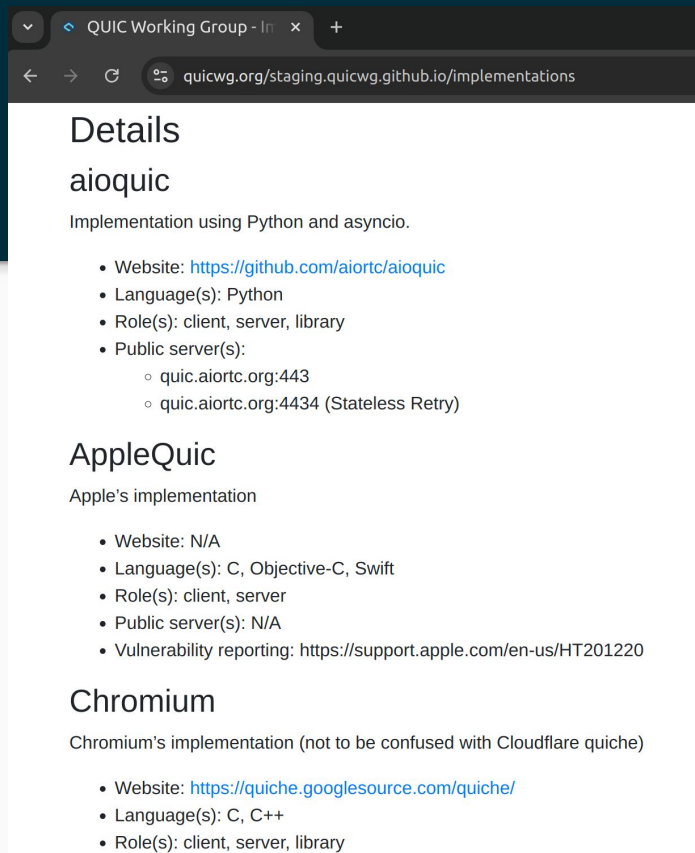

- WG Items
 - Multipath (15 min)
 - Address discovery (10 min)
- Other Items
 - QUIC Ack Receive Timestamps (20 min)
 - Extended Key Update (20 min)
 - Source Buffer Management (10 min)
 - Stream multiplexing (15 min)

qlog updates

- New set of drafts published this week
- 16 issues remain - <https://github.com/quicwg/qlog/issues>
 - Several relate to TLS
 - Several editorial
 - JSON-SEQ vs other streaming format (discussed at 121)
- QLOG extension schemas in other working groups
 - RTP over QUIC (AVTCORE)
 - Careful Resume (TSVWG)
 - MOQT (MOQ)

Revamping community resources

- Historically captured useful information in the *base-drafts* GitHub repo wiki
- Hard to contribute and maintain
- Wrong home for broad QUIC topics
- Proposal: revamp of quicwg.org
 - Contributions under IETF NOTE WELL
 - Familiar markdown and PRs
- Staging website:
<https://quicwg.org/staging.quicwg.github.io/>

The screenshot shows a web browser window with the address bar displaying `quicwg.org/staging.quicwg.github.io/implementations`. The page content is organized into sections for different QUIC implementations. The first section is titled 'Details' and lists 'aioquic', described as an 'Implementation using Python and asyncio'. It includes a bulleted list of details: Website (<https://github.com/aiohttp/aioquic>), Language(s) (Python), Role(s) (client, server, library), and Public server(s) (quic.aiortc.org:443 and quic.aiortc.org:4434 (Stateless Retry)). The second section is titled 'AppleQuic' and describes 'Apple's implementation'. It includes a bulleted list: Website (N/A), Language(s) (C, Objective-C, Swift), Role(s) (client, server), Public server(s) (N/A), and Vulnerability reporting (<https://support.apple.com/en-us/HT201220>). The third section is titled 'Chromium' and describes 'Chromium's implementation (not to be confused with Cloudflare quiche)'. It includes a bulleted list: Website (<https://quiche.google.com/quiche/>), Language(s) (C, C++), and Role(s) (client, server, library).

Details

aioquic

Implementation using Python and asyncio.

- Website: <https://github.com/aiohttp/aioquic>
- Language(s): Python
- Role(s): client, server, library
- Public server(s):
 - quic.aiortc.org:443
 - quic.aiortc.org:4434 (Stateless Retry)

AppleQuic

Apple's implementation

- Website: N/A
- Language(s): C, Objective-C, Swift
- Role(s): client, server
- Public server(s): N/A
- Vulnerability reporting: <https://support.apple.com/en-us/HT201220>

Chromium

Chromium's implementation (not to be confused with Cloudflare quiche)

- Website: <https://quiche.google.com/quiche/>
- Language(s): C, C++
- Role(s): client, server, library
